**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to a curable composition.

Group II, claim(s) 16, drawn to a sealant.

Group III, claim(s) 17, drawn to a liquid gasket.

Group IV, claim(s) 18, drawn to an adhesive.

Group V, claim(s) 19-30, drawn to a polymer.

Group VI, claim(s) 31, drawn to a curable composition with improved storage stability.

Group VII, claim(s) 32-56, drawn to a two component curable composition.

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The common technical feature of a vinyl polymer of a methyl ester with a cross-linkable functional group at the terminus is found in the prior art. Kitano et al., U.S. Patent 6,423,787 teaches a cross-linkable silyl terminated vinyl polymer of methyl acrylate (abstract; column 2, lines 36-63; column 3, lines 14-63; column 4, lines 8-column 6, line 64; column 7, line 53-

column 8, line 43; column 8, line 46-column 9, line 14; column 17, lines 32-64; column 24, line 35-column 25, line 55).

4. Because the common technical feature is found in the prior art, it does not amount to a special technical feature, therefore, unity of invention is not present. A telephone call was made to RICHARD LIONE on March 16, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
